**US Serial Number 09/606,555**

**New Claims superseding all previous:**

**What is claimed is:**

1. A packing material composite consisting of multiple assembled layers of thin flexible polymeric films containing tightly nesting sizeable domes.
2. The composite in claim 1 where the plurality of layers is five or more.
3. The composite in claim 1 where the polymeric film is 0.005 to 0.015 inches thick.
4. The composite in claim 1 wherein the domes are 1/8 to 5/16 inch high.
5. The composite in claim 1 wherein the domes differ in size and shape.
6. The composite in claim 1 wherein the dome positioning is varied.
7. The composite in claim 1 in roll, sheet or folded form.
8. The composite in claim 1 wherein the polymeric film is flexible and elastic and capable of the thermoforming of domes therein.
9. The composite in claim 1 wherein the film is a flexible, elastic and ductile polymeric material, such as polyethylene terephthalate, capable of the cold forming of domes therein.
10. A packing composite comprising a plurality of nesting domed polymer films which when separated and disoriented take up a large volume of space because of the domes therein.
